

EIRMA 2017 CTO Forum

“Fostering Intrapreneurship:

The New Competitive Edge?”

26 October 2017, Empa Academy, Zurich, Switzerland

Summary

Rapid and cost effective innovation is the primary source of lasting competitive advantage in the 21st century. Intrapreneurship is an increasingly used in the business world describing the integration of entrepreneurial skills into (large) corporations to nurture a climate of radical or incremental innovation. However, integrating a new mindset into a well-oiled system requires preparation and presents some challenges to consider:

- n How to fight potential inertia and how to help people to adapt to changes when they are used to a particular system
- n How to support management and the organisational hierarchy to help them to successfully embrace the intrapreneurship shift
- n How to make sure that costs of failure are minimised while the rewards of success are maximised

This CTO Forum will focus on the cultural aspects of intrapreneurship, after a workshop in June about the process and technic aspects. Petr Krupanský, Chief Innovation Engineer at ComAp and chairman of this workshop will give us a summary of the discussion and outcomes.

Issues addressed

- n Can intrapreneurship be implemented into an organization or does it need room apart (separate organisation)?
- n How to create a climate where people have the opportunity to create new things?
- n How to tackle internal resistance from people and/or business units with their own objectives/agenda?
- n How can the CTO be a strong mentor to support intrapreneurial activities, removing obstacles and resistance?
- n Does an intrapreneurship approach need start-up coaches to foster people?
- n How much intrapreneurial culture can R&D bear?

Target Audience

Chief Technology Officers, Chief Scientists
This event is on invitation only and limited to **30 participants**.

Chairman

Carlos Härtel, EIRMA Past President, CEO, GE Germany & Austria and Director GE Global Research Europe

Key themes	Innovation Processes
	Business strategy
	Intellectual Asset Management
	People and Knowledge
	Public frameworks

PROGRAMME

Thursday 26 October 2017

- 12:45 *Meeting at lobby Sorell Hotel Sonnenthal for transfer to EMPA Academy*
- 13:15 - 14:00 *Welcome coffee and snacks*
- 14:00 - 14:15 **Welcome and introduction - Multi-functional room, 3rd floor**
Carlos Härtel, EIRMA Past President, CEO, GE Germany & Austria and Director GE Global Research Europe
- 14:15 - 14:50 **Empa - How to create a place where innovation starts?**
As an interdisciplinary research institute of the ETH Domain, Empa, the Swiss Federal Laboratories for Materials Science and Technology, conducts cutting-edge materials and technology research. Empa's R&D activities focus on meeting the requirements of industry and the needs of society, and thus link applications-oriented research to the practical implementation of new ideas.
Gian-Luca Bona, CEO, Empa
- 14:50 - 15:25 **How to speed up innovation in your company: Lean, Agile and Fastwork process and technic aspects**
On 16 June, EIRMA members met in Prague at ComAp for a workshop on "[How to speed up innovation in your company](#)". This workshop provided a set of case studies covering a range of innovation management processes, including Agile and Minimum Value Product methodologies. Attendees learned about how and why each of these processes was adopted, and the issues to consider in implementing them.
Discussion sessions identified practical steps to move an organisation towards a more entrepreneurial approach. Petr Krupansky chaired this meeting and will give us his feedback about it.
Petr Krupanský, Chief Innovation Engineer, ComAp a.s
- 15:25 – 16:00 *Coffee Break*

- 16:00 – 16:35 **The manufacturing revolution: taking 3D Printing from lab to shop floor**
3D Printing – or more generally Additive Manufacturing – has been under development for several decades, primarily for rapid prototyping of plastic or metallic components. However, in recent years advances in technology, new material systems, and the development of new applications have brought 3D printing to a point where its use for series production has become feasible in several industries. In this talk we will present GE's

journey of taking 3D printing from a tool for lab applications to an essential manufacturing technology for performance critical jet-engine and power-plant components.

Carlos Härtel, EIRMA Past President, CEO, GE Germany & Austria and Director GE Global Research Europe

16:35 – 17:10

How to get a large company to think and act differently? – Space, Mobility and Open Innovation

Organisations often struggle with defining their vision for innovation, identifying their corporate “intrapreneurs” and embracing a learning culture. One of the key challenges for large companies is to find the right balance between exploration, experimentation and exploitation of new ideas, building the ecosystems for innovation and entrepreneurship. In this presentation, I will discuss the mix of three key elements - Co-working space, Mobility of scientists and engineers, and Open Innovation. In order to effectively harness the potential benefits of the ecosystems for innovation and entrepreneurship, companies need to build organisational culture and architecture for open innovation as learning organisations. Drawing on some examples, a variety of organisational and managerial practices as well as different types of open innovation strategies are discussed.

Fumi Kitagawa, Lecturer in Entrepreneurship&Innovation, University of Edinburgh Business School

17:10 – 18:00

Open Discussion

18:00 – 18:15

Conclusion and wrap-up

Carlos Härtel, EIRMA Past President, CEO, GE Germany & Austria and Director GE Global Research Europe

18:30 – 19:15

Visit of Empa

19:15 – 19:45

Award Ceremony of the “European CTO of the Year”

The “European CTO of the Year” award will be officially launched at the EIRMA Annual Conference on 18-19 May 2017 by EIRMA and Spinverse Ltd.

This award is annually given to a CTO who is both an inspiring leader and a competent technology developer. The winners are awarded in two categories in order to highlight that both SMEs and large corporations are needed to support technology-based growth in Europe.

The concept is pan-European and has been endorsed by Robert-Jan Smits, Director-General for Research and Innovation of the European

Commission: “Europe needs to celebrate those who advance technology and innovate. Initiatives like the “CTO of the year award” are very welcome as they lead to role models and further strengthen innovation in Europe”.

Nomination of candidates can be done at <http://www.ctoeurope.net/>

19:45

Transfer to the hotel/restaurant

20:30

Dinner at the hotel

22:00

End of CTO Forum 2017

PRACTICAL ARRANGEMENTS

Venue	Empa Academy (NEST building) Ueberlandstrasse 129 8600 Dübendorf - Zwitterland
Accommodation	Sorell Hotel Sonnentäl Zürichstrasse 94/96 8600 Dübendorf - Zwitterland T +41 44 802 12 82 www.sorellhotels.com/sonnentäl A block booking of rooms for the nights of 25 and 26 October 2017 has been made at the price of CHF 117.50 (single room, breakfast incl), CHF 200,00 (double room, breakfast incl).
